SKILLS

- React.js
- Linux
- Node.js
- NestJS
- PostgreSQL
- MongoDB
- Redis
- Docker
- JavaScript
- TypeScript
- Git
- C/C++

EXPERIENCE

EVER (SOFTWARE DEVELOPER, B2B)

january 2025 - april 2025

I developed the backend using NestJS and the frontend using Next.js. I built AI agents with LangChain and APIs of popular language models like GPT. I integrated the code with external services such as Tavily, GitHub, and Supabase

PROJECTS

PANDJS JAVASCRIPT RUNTIME (OWN PROJECT)

A JavaScript runtime based on the V8 engine with non-blocking I/O, inspired by Node.js and Deno. It supports ES6 modules, timers, TCP, and more. The event loop was developed from scratch without using external libraries. The project was written in C, C++, and JavaScript.

NOVU (OPEN SOURCE CONTRIBUTIONS)

A unified API for developers, simplifying the process of sending notifications across various channels such as app, push, email, SMS, and chat. During a year of involvement as a volunteer, I became one of the top contributors to the project (with over 36,000 stars on GitHub) and a moderator on their Discord server (with over 4,000 members), where I help build the community.

EDUCATION

MARIA CURIE-SKŁODOWSKA UNIVERSITY IN LUBLIN

Computer Science (bachelor)
2023 - ongoing
